7.69.0 New Features

This guide lists new features available in **eTapestry** 7.69.0, released on November 7, 2021.

DIY Forms: Phone Field

In response to feedback, the **Phone** field on all DIY forms is no longer required. Previously, this field was required on transaction pages.

When you create a new DIY page, the **Phone** field is not required by default. To require users to enter phone numbers on your form, when you edit your form, select the **Phone** field.

The screenshot shows a form configuration window titled "Edit Phone". Inside the window, there are three rows of configuration options:

- Field Name**: Phone
- Label**: A text input field containing the text "Phone".
- Required**: A checkbox that is checked with a blue checkmark.

At the bottom of the window, there are two buttons: "Update" and "Cancel". The "Update" button is highlighted with a black border.

To require phone numbers, select the **Required** checkbox and select **Update**.

Tip: For published forms, the **Phone** field will be set to required by default.

Look and Feel Improvements

To stay current with the latest software standards, we are updating the look and feel of **eTapestry**. Although these updates should not disrupt your current processes, you will likely notice slight changes in how information appears. With this release, we updated some font sizes, field labels, help content, and click-able areas to improve usability.
