# 7.69.0 New Features

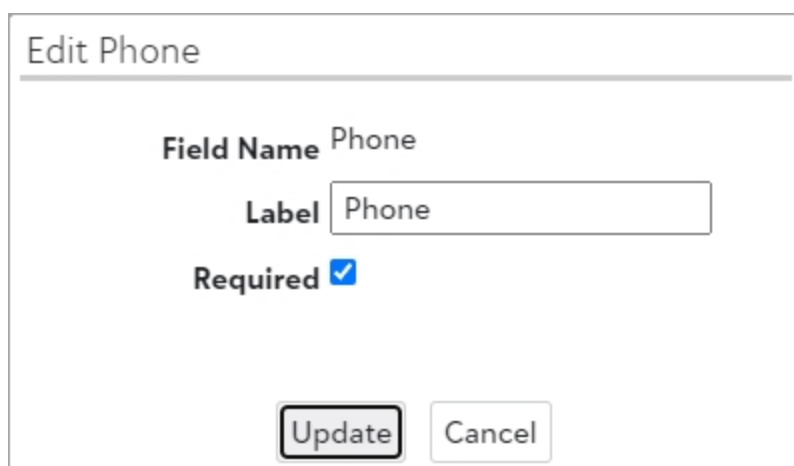

This guide lists new features available in *eTapestry* 7.69.0, released on November 7, 2021.

## DIY Forms: Phone Field

**Note:** This update does not impact published forms. For published forms, the **Phone** field will still be set to required by default. You will need to edit the form to change the field's requirement status and republish your forms in order for changes to appear.

In response to feedback, the **Phone** field on all DIY forms is no longer required. Previously, this field was required on transaction pages.

When you create a new DIY page, the **Phone** field is not required by default. To require users to enter phone numbers on your form, when you edit your form, select the **Phone** field.

The screenshot shows a form configuration window titled "Edit Phone". It contains the following elements:

- Field Name**: Phone
- Label**: A text input field containing "Phone".
- Required**: A checkbox that is checked.
- Buttons**: "Update" and "Cancel" buttons at the bottom.

To require phone numbers, select the **Required** checkbox and select **Update**.

## Look and Feel Improvements

To stay current with the latest software standards, we are updating the look and feel of *eTapestry*. Although these updates should not disrupt your current processes, you will likely notice slight changes in navigation or how information appears. With this release, we updated some font sizes, field labels, help content, and click-able areas to improve your experience.
