Parts	6
Users & Security	7
Maintenance Changes	8

This guide provides an overview of new features and enhancements for Blackbaud NetCommunity 6.64 Maintenance Release. For information about how to install or update to this version, see the *Infinity Platform Installation and Upgrade Guide*.

Note: You must use The Raiser's Edge 7.93 or higher to integrate with Blackbaud NetCommunity 6.64. For Support assistance, create a case on [Case Central](#).

Note: You must use The Education Edge 7.84 or higher with The Raiser's Edge 7.93 or higher to integrate with Online Campus Community 6.64. For Support assistance, create a case on [Case Central](#).

reCAPTCHA Instructional Text

The default field label that appears for the image prompt on payment and new user registration forms that include reCAPTCHA images is changed. Previously, the label instructed users to "type the two words" shown in the reCAPTCHA image. Now, the text instructs them to "enter the text" since the images typically include characters that do not form words.

To change the new default message, navigate to the Language tab on the parts that include reCAPTCHA. Next, select the reCAPTCHA category and update the text in the **Image prompt** row.

The row is available for these parts:

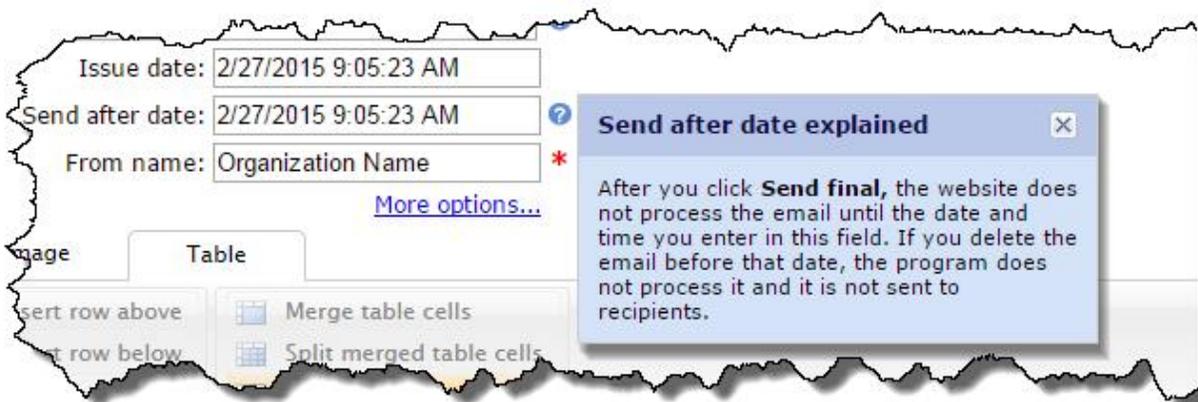

- Donation Form
- Payment
- Payment 2.0
- User Login

Email

The following *Email* enhancements are available. For more information, refer to the *Email Guide*.

Help Text in Messages

New help text is available for the **Send after date** field in *Messages* to explain that after you click **Send final**, the website does not process the email until the date and time you enter in the field. It also explains that if you delete the email before that date, the program does not process it and does not send it to recipients.

Block Sending Email Messages and Scheduled Email

Your System Administrator can now use the BlockAllEmails and BlockScheduledEmails settings to prevent inadvertently sending email messages and scheduled email from a test environment. To do this, you must add `<add key="BlockAllEmails" value="True" />` and `<add key="BlockScheduledEmails" value="True" />` to the appSetting node in the web.config file. By default these settings do not appear in the file, and the default behavior is False.

Tip: The BlockScheduledEmails setting *only* blocks emails sent from the *Email, Scheduled emails* functional area. It does not block scheduled emails set to send when you use the **Send after date** field in *Messages*.

If Blackbaud Hosts your website and you want to request an update to your web.config file, contact Customer Support by [creating a case](#) on Case Central.

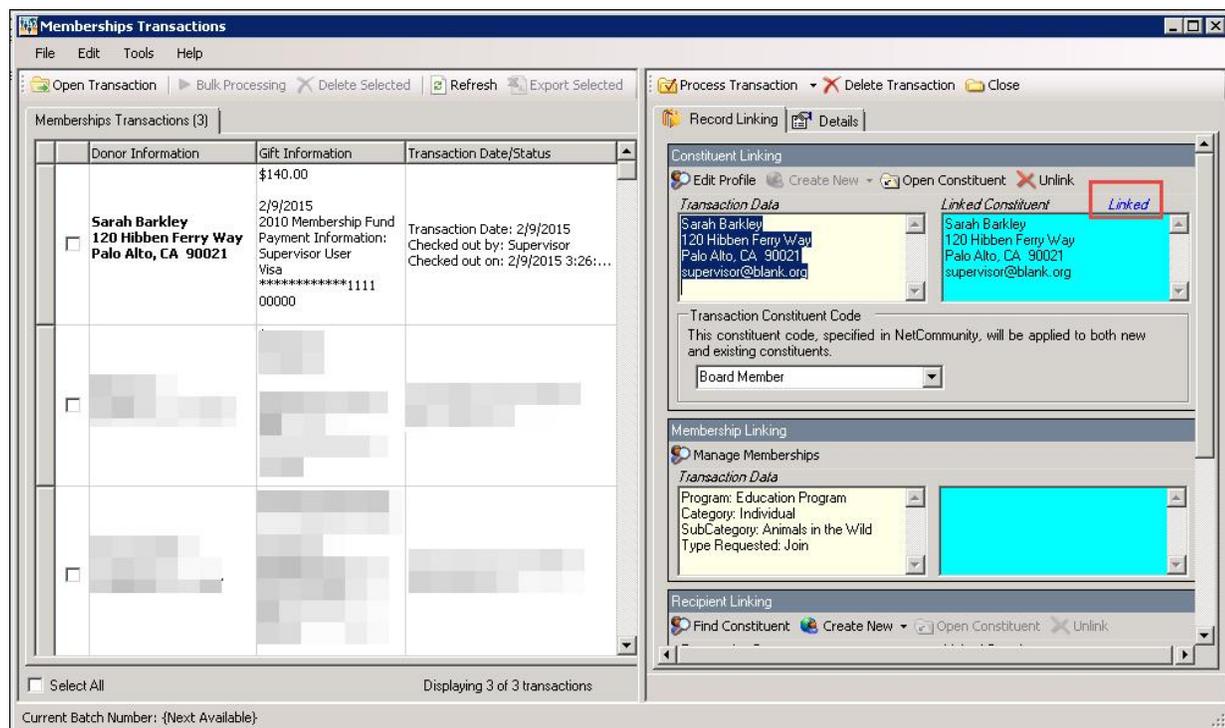

Note: With this change, the ProcessCMSEmail.BusinessProcess.vb file has been updated for the Process CMS Email Business Process in The Raiser's Edge.

NetCommunity Page in The Raiser's Edge

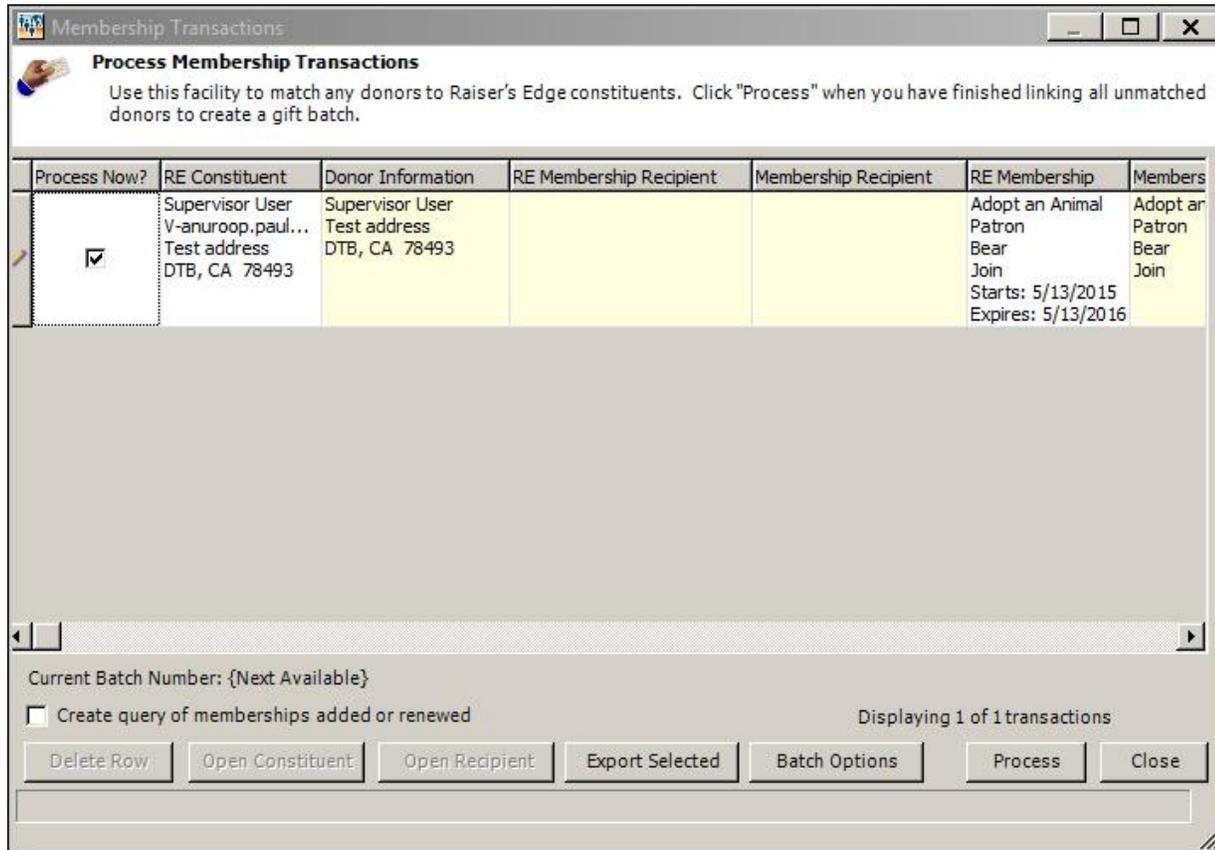

The following enhancement to the NetCommunity page in The Raiser's Edge is available. For more information, refer to the *Blackbaud NetCommunity & The Raiser's Edge Integration Guide*.

Membership Transactions

The Membership Transactions screen now matches the screens that appear for other transaction types on the NetCommunity page in The Raiser's Edge.

Previously, the screen included a different format.

This change creates consistency so you can use the same process for all transactions you add to your database.

Pages & Templates Enhancements

Updates in *Pages & templates* allow you to more efficiently search for pages and work with their parts.

Search Filters

To help you quickly find the pages you need, new search filters are available. From the Search tab, you can use the new **My content** or **Filter by template** options to narrow the results to pages you created or that use a specific template.

Pages & templates

[+ New page](#) [+ New template](#)

From Pages & templates, you create a

Folders **Search**

Page name, title or url contains:

Pages containing part type:

Page types to include:

Filter by template in use:

My content

Site:

Also, when you search for parts to insert on pages, the **My content** filter is available so you can limit the list to the parts you created.

Filter by type:

Filter by name:

Filter by site:
 My content

<u>Part name</u>	<u>Part type</u>	<u>Owner</u>
Admin - Style Guide	Formatted Text and Images	Supervisor
Admin - Header Text	Formatted Text and Images	Supervisor

Additional Copy Part Option

You can now copy parts from the Page content tab when you highlight a page in the list of pages. This change reduces the number of clicks required to copy parts when you navigate to them from the list of pages. Previously, you had to edit the pages to copy them or copy them from *Parts*.

New Sort Options

You can now use **Page name** or the new **Last modified** column to sort the list of pages. These changes help you to quickly find the pages you need.

Note: When you sort the list, the pages appear in ascending order. Pages that begin with the letter A, or include the oldest changes, appear at the top of the list.

Parts

The following *Parts* enhancements are available.

Search Filter

To help you quickly find the parts you need, a new search filter is available. From the Search tab, you can use the new **My content** option to narrow the results to parts that you created.

Parts

Middle Name Field

The Donation Form, Payment, and Payment 2.0 parts now include the **Middle name** field under **Additional fields**.

Note: This change satisfies the Canadian Revenue Agency's requirements for donation receipts.

Additional fields

Select the additional fields to display on the donation form.

Field	Include	Required
Middle Name	<input type="checkbox"/>	<input type="checkbox"/>

Users & Security

The following *Users & security* enhancement is available.

Site Administrators Filter for Users

Now when you use filters in *Users*, you can identify the people who are site administrators. Previously, you could only filter by the roles you added to your website. This change helps you quickly identify people with administrative access when you need to change rights, such as when a person is no longer employed by your organization.

The screenshot shows a web interface for filtering users. At the top, there is a section titled "Filter by back office link:" with a dropdown menu. Below this, there are two checkboxes: "Deleted" and "Supervisor". The "Supervisor" checkbox is checked and circled in red. To the right of these checkboxes is a "Filter" button. Below the filter controls is a table with two columns: "Username" and "Last login". The table contains one row with the value "Supervisor1" under the "Username" column.

Username	Last login
Supervisor1	

Maintenance Changes

Blackbaud NetCommunity version 6.64 includes these changes.

Maintenance Release (Patch 12, July 2015)

The following client facing changes were implemented in the 6.64 Maintenance Release.

- An issue that caused sign-up requests you exported from the NetCommunity page in The Raiser's Edge to not include all of the biographical fields no longer occurs. The issue occurred when the requests were exported in CSV format.
- An issue with date attributes on the Donation Form and Event Registration Form (Classic) parts on a Blackbaud NetCommunity web page no longer occurs. When you process these to The Raiser's Edge, the program now changes the format to a short date so the transactions download successfully.
- When a donation web page uses culture settings set to display date formats as dd/mm/yyyy, this fix eliminates the message 'String was not recognized as a valid DateTime' that potentially occurred when the page included a date attribute field.
- An issue with decimal amounts for international customers who use the Membership Form part no longer occurs. Membership prices now display and process correctly. Previously, amounts that included a decimal were multiplied by 100.
- An issue with decimal amounts for international customers who use the Event Registration Form (Classic) part no longer occurs. When a website user progresses through the event steps from the part on a web page, amounts that include a decimal are no longer multiplied by 100. With this fix, amounts accurately reflect the exact amount the user entered and also process correctly to The Raiser's Edge.
- An issue that caused registrants to appear twice on an event record in The Raiser's Edge when they entered spaces at the end of the First Name field on the Event Registration Form no longer occurs.
- An issue that caused an error to appear when you attempted to send emails to large recipient lists no longer occurs. This issue occurred after you upgraded to the 6.64 version of the product.
- An issue that prevented the Volunteer Opportunity part from processing volunteer transactions to batch in The Raiser's Edge no longer occurs.

- When a donation web page uses a language that has a comma for the currency separator, the donation amount is no longer incorrect. This fix corrects the actual donation amount and format on the web page. The amounts are also now correct for acknowledgements and receipt emails. However, they display using the United States currency format (addressed in 509641). If you have a customization for currency values with periods, please be aware there may be an impact to the web page when you view it in a different language.
