What's New: Q1 2023 (March) Release

Welcome to the Q1 2023 release of **ResearchPoint**!

> **Note:** This What's New topic automatically appears after a new release so you know what's what. To quickly check back and review a new feature, select the starburst link at the top right of any help topic.

Data Updates

- We updated our data source of "NOZA, Inc." to the rebranded "Blackbaud Giving Search."

Raiser's Edge - ResearchPoint Integration

We completed preparation work for upcoming enhancements to the **Raiser's Edge** - **ResearchPoint** integration. For clients using this functionality, we'll provide more information on the integration enhancements in the coming weeks through Customer Success and the Community. Be sure to subscribe to the Blackbaud Target Analytics Community for announcements on the integration updates.

Navigation Improvements

We added several omnibar enhancements this release.

ResearchPoint Feedback

Do you want to influence the direction of the product? You can in the Target Analytics Community. We're there with you in the community and we're listening for which features you want added or which existing functionality needs to be improved.

You can add a new idea, vote for ideas you want to see implemented, or respond to an existing idea with comments about what you need specifically. The more you tell us, the better we can prioritize and design the product around your organization's needs.

How do ideas get implemented? Ideas with the most likes are more heavily favored when we consider what we should put on our roadmap for **ResearchPoint**. To see all the current user-posted ideas, from the Target Analytics Community home page, in the **Navigation Menu**, click **Ideas**. We look forward to hearing from you on how you need **ResearchPoint** improved!
