

Release Notes: Q2 2022 (May) Release

Before you begin to use Target Analytics **ResearchPoint**, take a moment to review the following notes. It is important to share this information with all **ResearchPoint** users in your organization.

Property Value Refresh

Prior to this update, there were situations where the Property value wasn't getting updated for some properties previously returned from a wealth screening or from the prospecting database. We've updated our property value algorithm so that this issue is no longer occurring.

SEC Information Update

Following this update, we've removed the Issuer name link when reviewing a Security from Assets on the Wealth and Ratings page. The change was made due to the SEC Info website being down, so instead, ResearchPoint will simply display the name of the security.

Target Analytics Data Updates

Since our Q1 2022 release, we have refreshed the data for Refinitiv, NOZA, CoreLogic, Who's Who, and Dun & Bradstreet in our Target Analytics database.

Now, when you perform WealthPoint screenings on a prospect's wealth and ratings record, or when you perform a screening on your research lists, you'll have the latest philanthropic gifts, real estate assets, business assets, and leaders.

ResearchPoint Feedback

Do you want to influence the direction of the product? You can in the [Target Analytics Community](#). We're there with you in the community and we're listening for which features you want added or which existing functionality needs to be improved.

You can add a new idea, vote for ideas you want to see implemented, or respond to an existing idea with comments about what you need specifically. The more you tell us, the better we can prioritize and design the product around your organization's needs.

How do ideas get implemented? Ideas with the most likes are more heavily favored when we consider what we should put on our roadmap for **ResearchPoint**. To see all the current user-posted ideas, from the Target Analytics Community home page, in the **Navigation Menu**, click **Ideas**. We look forward to hearing from you on how you need **ResearchPoint** improved!
