

# Release Notes: Q4 2022 (October) Release

Before you begin to use Target Analytics **ResearchPoint**, take a moment to review the following notes. It is important to share this information with all **ResearchPoint** users in your organization.

## Multi-Factor Authentication is Live

On October 4, ResearchPoint joined many other Blackbaud products in requiring Multi-Factor Authentication.

Multi-Factor Authentication (MFA) requires a user to successfully validate at least two of three factors to authenticate. Blackbaud ID (BBID) will require MFA using your password (what you use today) and a unique time-based one-time code, accessed on a secondary device. We are proactively making this change, by enforcing industry standard security measures, to help safeguard your organization and your data.

Communication went out earlier in the month and featured additional details on this upcoming change. For more information, please visit the [Knowledgebase](#) or the [help center](#).

## Ad Hoc Query Update

When using **Apply Criteria** with the **One Of** or **Not One Of** operators in an Ad Hoc Query, we've added a Copy and Paste List option so you no longer need to add each row value one-by-one.

Users can now copy a column or list selection from *Excel* and paste the values as rows into the grid for a Text or Number field. After selecting **Paste**, a window appears with a text field to paste the list into, then on submit the list will be processed, split, and added as rows with values into the grid.

## Target Analytics Data Updates

Since our Q2 2022 release, we have refreshed the data for GuideStar, CoreLogic, Dun & Bradstreet, Refinitiv, and Blackbaud Giving Search in our Target Analytics database.

Now, when you perform WealthPoint screenings on a prospect's wealth and ratings record, or when you perform a screening on your research lists, you'll have the latest philanthropic gifts, nonprofit and foundation affiliations, real estate assets, business assets, and political donations.

## ResearchPoint Feedback

Do you want to influence the direction of the product? You can in the [Target Analytics Community](#). We're there with you in the community and we're listening for which features you want added or which existing functionality needs to be improved.

You can add a new idea, vote for ideas you want to see implemented, or respond to an existing idea with comments about what you need specifically. The more you tell us, the better we can prioritize and design the product around your organization's needs.

How do ideas get implemented? Ideas with the most likes are more heavily favored when we consider what we should put on our roadmap for **ResearchPoint**. To see all the current user-posted ideas, from the Target Analytics Community home page, in the **Navigation Menu**, click **Ideas**. We look forward to hearing from you on how you need **ResearchPoint** improved!
