

Blackbaud Award Management™

Scholarship Management and Donor Reporting Solution

The Blackbaud Award Management solution serves as the catalyst to improve student access to scholarships, hardship funds, bursaries and prizes. Enhance your institution's cross-functional visibility throughout the scholarship process and revolutionize donor reporting.

Improve student access to scholarship funds

A single scholarship website makes it easy to promote all scholarships at your institution to your student population. Every student receives a unique view, with scholarships that best match his or her qualifications. Our integration with your student information system shortens the time it takes to complete applications and improves the quality and accuracy of data on each application.

Enhance cross-functional visibility throughout the scholarship process

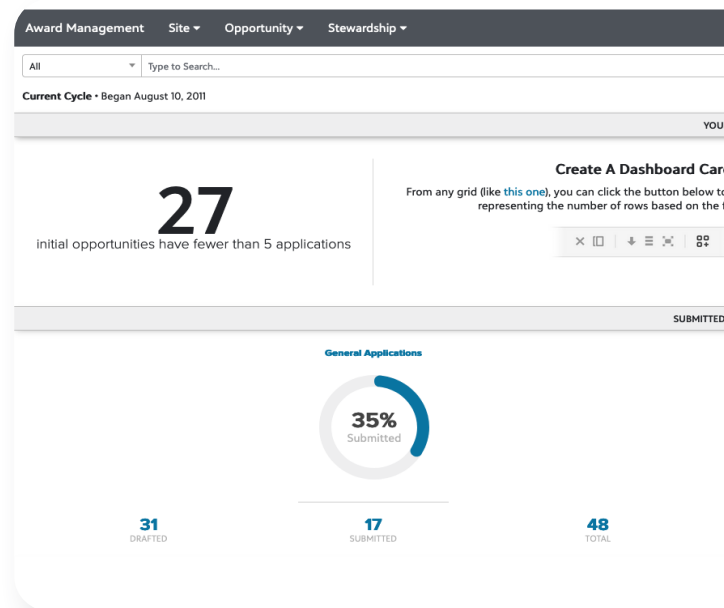

Keep your scholarship process running on time and efficiently by giving all cross-functional stakeholders access to one central solution. Flexible permission functionality provides access to information while keeping student data protected.

Revolutionize donor reporting

We provide access to curated fund financial data, donor contact information, and beneficiary information for scholarship and non-scholarship funds, creating one unified database for donor reporting. User roles and permissions are available to curate donor communications without affecting your system or record.

“We can just download donor reports from the system, and we don't have to create them. That saved a lot of time.”

— Ann Schubert, Operations Coordinator, Austin Community College Foundation

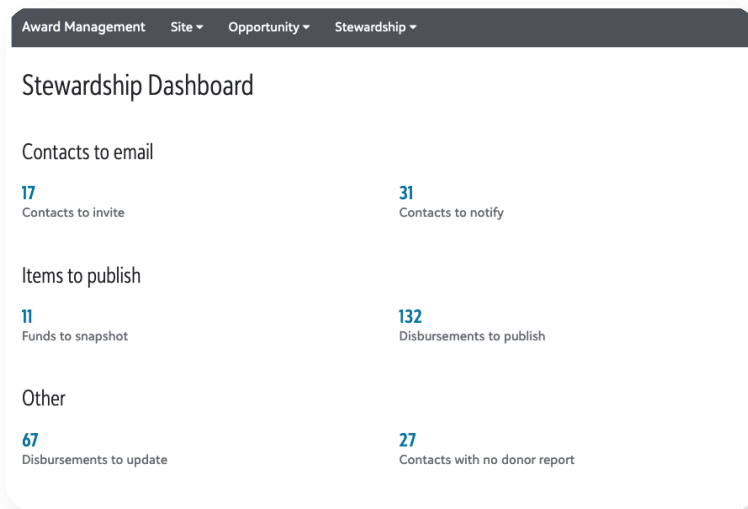

Create impactful ways to steward scholarship and non-scholarship donors

Central to your donor stewardship strategy, Blackbaud Award Management combines key donor data from your CRM, fund financial data, thank-you letters, and other fund beneficiary information in a single platform to share impact with donors. With easy access to data, discover new and effective ways to steward more donors such as creating donor reports with the click of a button to mail, email, print, or view online. Provide donors with an online scrapbook experience to see their complete impact throughout the lifetime of their gift.

“I think the donor portal is a really great way for donors to see the impact they're making.”

”

— Ann Schubert, Operations Coordinator,
Austin Community College Foundation

Blackbaud Award Management allows your institution to:

- Provide a searchable website for all scholarships
- Import and export data nightly from your student information system
- Allow references to submit notes online
- Match applicants to scholarships
- Notify students of scholarship awards
- Collect donor acknowledgements and photos from award recipients
- Combine scholarship recipient data with fund financial data and donor contact information
- Create donor reports to print or email and for donors to access online
- Advertise the contributions of donors using online profiles
